

Yan Oi Tong Chan Cheng Yuk Yee Kindergarten

School Year: 2024/25

Grade: K1

Activity Name: Visit to “Cube O Discovery Park”

Activity Objectives:

1. Learn about different marine life, explore the growth of jellyfish, and witness their reproduction firsthand, sparking children's interest in marine life.
2. Learn to respect and protect the ocean and its inhabitants.

Activity Overview and Record:

Children explored the look, traits, and reproduction strategies of jellyfish in the Exploration Pavilion, where they also learnt about and appreciated a variety of marine life. The children were particularly intrigued by the guide's feeding of the jellyfish. Children next went to the Reptile Ecology Exhibition, where they saw a variety of reptiles, including hedgehogs, tortoises, and lizards. They happily took pictures while caressing the tortoise's shell and closely examining the lizard's body. Children also learned about the need of conserving and caring for animals from the guide's remarks. Lastly, they went to the marine children's playground to enjoy the rides and took part in a virtual reality ocean exploration tour.
