

Yan Oi Tong Chan Cheng Yuk Yee Kindergarten

School Year: 2024/25

Class: K3

Activity Name: Connecting with Nature - Visit to Kowloon Tsai Park

Activity Objectives:

1. To enable young children to connect with nature through a visit to Kowloon Tsai Park, and to explore its diverse elements using their various senses.
2. To cultivate children's love for nature and teach them the importance of cherishing Earth's resources.

Activity Overview and Record:

In the park, the children saw different plants (such as flowers, big trees, lawns, etc.). They discovered that leaves have different shapes and saw bees collecting nectar among the flowers. During the process, the children noticed ants moving under a large tree, which sparked their interest. They used a magnifying glass to observe and found that the ants were lining up to carry food, showing their curiosity about nature. At the same time, the teacher and children read the picture book "The Little Gardener" and sketched on the lawn. They expressed, "Reading under the sunshine is really so happy." Finally, the children also had snacks in the pavilion, enjoying nature together in the soft sunlight, which was truly a unique experience.
